NBV 2x36 IP65 P

DIRECT RADIATION UV-C GERMICIDAL LAMP FOR INDUSTRIAL USE

HOW DOES THE DIRECT RADIATION UV-C GERMICIDAL LAMP FOR INDUSTRIAL USE WORK?

Direct radiation germicidal lamps type NBV IP65 are designed to prevent primary and secondary infections in the food, pharmaceutical and cosmetic industries, warehouses, and everywhere the production process takes place. Direct radiation germicidal lamps applied in the rooms where airborne pathogenic microorganisms (pathogens) live, significantly reduce the probability of spreading the infection by air. Raising the level of microbiological purity of the air and surface helps to destroy and reduce the impact of existing outbreaks of pathogens.
